## Enterprise Infrastructure Design

Andrew Beattie is an enthusiastic and experienced enterprise infrastructure architect. He is well versed in infrastructure design, including storage area networks, Unix and blade servers, high availability, disaster recovery, virtualisation and cloud infrastructure.

Often regarded as a “larger-than-life character”, he possesses the proven ability to develop strong and successful business relationships, consistently exceeding expectations.

Andrew has a broad range of experience encompassing enterprise infrastructure from HP, IBM, EMC and Brocade but is more than happy to explore and evaluate all new technology offerings against business requirements. Having worked extensively with manufacturers and their sales channels, he is well positioned to see through manufacturer’s colourful claims to dig down to the truth.

Andrew’s technical depth is well matched by his ability to win the trust and confidence of the people that he works with. He is an adaptable and pragmatic individual able to contribute effectively in any environment.

## Career Highlights

- Proposing and designing the BT domestic billing architecture, including two 7-node Unix HA clusters replicating between enterprise storage arrays 140 miles apart
- Trusted advisor and architect to New Look, delivering mission critical, batch infrastructure.
- Proposing and designing a new SAP infrastructure for Yellow Pages, with DR replication to a neighbouring town
- Architect for PepsiCo, designing a replacement datacentre infrastructure
- Proposing and designing a new high performance BT interconnect billing infrastructure.
- Founding Möbius Business Technologies, an infrastructure reseller and virtualisation specialist, which has been profitable every year from launch.

## Employment History

1986-1998: Unix consultant at Sphinx, Plexus and self employed  
1998-2001: Infrastructure architect at Morse  
2002-2010: Infrastructure architect at Selway Moore  
2010-present: Technical Director at Möbius Business Technologies
